

## **Enhancements**

### **Catering:**

- Added: Checks to Repeat and Recur events to ensure double booking cannot occur
- Added: Client Number to client setup and client dropdown for events
- Added: Event Host to Catering Search options
- Added: Search contact combos to load Last Name, Suffix, First Name, and Middle Initial. Also added multi-character search capability
- Fixed: Close Event functionality to not allow user to close an event if a deposit has not been exported.
- Fixed; Catering grids so that the user does not have to click Apply after each added record

### **Membership:**

- Added: Member Type text box to the top of the membership main form to display the member type at all times regardless of what tab the user is currently using
- Fixed: Retire process so that a member with a balance and/or activity could not be mistakenly retired

### **AR:**

- Added: Member Type data to Month End Batch Type grids to allow user to view and sort month end charges by member type
- Added: Option to GL Export to create a batch in CYMA as posted. NOTE: This will only work for CYMA version 10
- Added: Option to month end process that moves statement and trans data all at once, instead of by batch. To turn on this option: Before the user clicks ok to start the EOM closing process, the user must check the checkbox that reads "Move Data To History In Mass"

### **POS:**

#### **-Manager:**

- Added: Option to archive only one or all employee time entry records.
- Changed: Revenue code dropdown to be sorted by code and allow multi-character search

**-Terminal:**

- Modified: POS Terminal Profile screen to exclude retired family members from display
- Added: When tendering a ticket to a reciprocal club, the member name and number will automatically save in a new table called Reciprocal Entity. A search button was added to the screen where reciprocal info is entered. By clicking the search button a list of all previously saved reciprocal members will pop up, selecting a member from the list will automatically fill in the name and number on the reciprocal info screen
