

Enhancements

AR:

- Fixed: Issue where GL codes were not showing up on a revenue code if the Use CYMA Interface was enabled

POS:

-Terminal:

- Added: Additional summaries and gratuity break down on End Of Day report from POS Terminal- also added these to server reports in terminal
- Added: Additional error logging if printer or print command fails

-Manager:

- Added: Additional error logging if printer or print command fails
- Fixed: Saving revenue codes to menu items when using Revenue Code Wildcarding

Reports:

- Added: New feature that makes a user choose a default version to export to. Once chosen it will retain these defaults for future exporting

ProShop Keeper Integration:

- Fixed: Where Last Names were not being updated in PSK if the user was using POSExpress
- Fixed: Where Middle Initial and other misc. info was not updating to PSK if the user was using POSExpress
- Added: Functionality to allow dependants to be updated to POS Express even if interface is set to read only
- Added: Functionality to allow Guest Tracker to utilize tiered pricing options in POSExpress
