

## **Enhancements**

### **AR:**

- Added: Copy feature for minimum Cycle Setup
- Added: Functionality to allow tax and service charge amount overrides in Event and Mass Billing
- Added: Code changes to find the CYMA path on a Vista machine
- Fixed: Ticket drill down issue for PSK tickets that had a member number changed on the ticket
- Changed: Member account screen to load balance type combo box by the sort order field, and added functionality so that when the form opens , it will display the same balance type that was displayed the last time the form was opened
- Users can now select the column width of the account detail screen

### **Membership:**

- Added: System message to force a member type selection when updating a prospect to a member
- Fixed: member photos not sizing properly to Membership Manager
- Fixed: Issue when adding a prospect and not exiting the form before adding a dependant to the prospect
- Fixed: System status message on Un-Retiring a member

### **POS:**

- Added: Functionality to tell if a ticket has been reopened or retendered and by whom
- Fixed: Issue with PLU numbers not writing to the Ticket Detail table
- Fixed: Issue in POS Terminal for voiding tickets. System will now display the person who voided the ticket
- Fixed: Tip pool report to show summary of all tip pool participants and extra gratuity
- Fixed: Alpha numeric zip code entry for credit cards in POS
- Fixed: POS Reports

### **Marina:**

- Added: Quick Lookup
- Added: Waiting List
- Added: Print functionality to the printer icon in Slip & Dry Storage

- Fixed: Functionality for locations and pier slip setup
- Fixed: Functionality to allow user to delete more than one item
- Fixed: Added button to allow user to put focus in description text box
- Fixed: Event to not wipe out location text on treeview
- Fixed: Combo box to separate slips from dry storage when setting them up
- Fixed: System to auto check the Bill To months when setting up a monthly recurring charge
- Fixed: Delete charge type functionality to first check to make sure no charge type exists on slips or dry docks before it is deleted
