

Enhancements

AR:

- Added: The ability to apply payments to the oldest balance- no matter what the balance type
- Added: The ability to view a member's type in Accounts Receivable Detail Lookup screen
- Added: The ability to sort revenue codes either alphabetically or numerically
- Added: Member number search box in batch edits. If the wrong number is entered an error message will be displayed
- Added: Sponsor Credit Program
- Increased: The maximum message size for an email message to 3,000 character

Membership:

- Added: The ability to file in the membership correspondence tab by just double clicking on the item

POS:

- Added: Ticket numbers to credit card slips
- Added: The ability to update the ticket info section with a remaining balance when a partial payment is made on a ticket
- Added: The ability to see the member type when opening a ticket in POS
- Added: The ability to print POS Alerts on the kitchen ticket when the order is fired to the kitchen printer
- Added: Ability in POS for the Purchaser's name to now show when a Gift Certificate is redeemed
- Added: Functionality and audit trails to combined and voided tickets. Now when a ticket is combined the original voided ticket number is reflected in the description of the ticket number it was combined with
- Added: The ability to turn on or off automatic meal period switches on open tickets
- Enhanced: End of Day Reports from POS Terminal to now include a subtotal for each pay type
